Reason for Allowance

1. Regarding claims 1-7, the prior art fails to teach or suggest a method of forwarding data packets according to an order of forwarding, comprising the steps delaying generation of a subsequent resource request for the second data packet for a specified time period; and generating a second resource request for the second data packet before the specified time period is due to expire, when the first data packet is forwarded such that a delay attribute to the specified time period is lessened, in combination with other limitations, as specified in the independent claim 1.

Regarding claims 8-14, the prior art fails to teach or suggest a method of forwarding data packets, comprising the steps specifying a first wait period during which a subsequent buffer request for the data packet is not to be generated; and reducing the first wait period when the data packet transitions to the head of the queue, in combination with other limitations, as specified in the independent claim 8.

Regarding claim 15-21, the prior art fails to teach or suggest an apparatus, comprising a processor coupled to the inbound memory and which generates a first resource request corresponding to a data packet stored in the inbound memory and not first in the order, the processor also adapted to delay generating a subsequent resource request for the data packet for a specified time period, wherein the processor also generates a second resource request for the data packet before the specified time period is due to expire upon the data packet becoming first in the order, in combination with other limitations, as specified in the independent claim 15.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
